Meeting Report – Milestone 5, Week 11

Attendees

- Ryan Coutts
- Jeffrey Woods
- Tiare Munoz

Action Items

- Implement feature that allows the user to alter the color scheme directly from the GUI
- Reduce the “flashing” that occurs in the GUI when the screen is updated
- Expand the scope of the program to have 250 memory locations and allow for 6-digit words
- Ensure that the “old” format of the files is still allowed despite the allowance of 6-digit words
- Allow for multiple windows to be open and edited simultaneously
- Add any necessary unit tests for the changes above

Assignments

Ryan Coutts

- Expand program to allow files up to 250 lines long
- Allow 6-digit words and math
- Create unit tests for any updated or added classes/methods
- (TODO from previous milestone) minimize “flashing” animation upon refreshing GUI memory

Jeffrey Woods

- Ensure “old” format still runs on program
- Implement GUI feature to process correct file format “old or new”
- Create unit tests for any updated or added classes/methods

Tiare Munoz

- Allow for multiple file windows to be open and edited simultaneously
- (TODO from previous milestone) Allow for the user to alter the color scheme from GUI
- Create unit tests for any updated or added classes/methods
