Meeting Report - Milestone 4, Week 9

Attendees

- Jeffrey Woods

- Tiare Jorquera Muñoz

- Ryan Coutts

Agenda

Discuss New Assignments

- Non-core functionality will be assigned to Emily

Discuss Blockers/Questions

- Tiare: Should resetting the state be its own function?

  - We decided yes

- Ryan: Should user be able to edit memory fields in-place?

  - Ryan's current solution is fine; any refinement beyond it is non-core

- Jeffrey: Which tasks are not core to functionality?

  - We decided certain UI refinements, updating design docs

Action Items

Ryan	Tiare
• Separate out each function into its own requirement in SRS - **DONE** • View and edit the code before executing - **IN PROGRESS** • ~~Update design docs~~	• Clear all fields upon file load - **DONE** • Configurable color scheme - **IN PROGRESS** • ~~Update design docs~~
